

AP Automation for Manufacturing:

Financial Control at the
Speed of Production

Powered by Yooz

Executive Summary

Manufacturing runs on precision. Every process is optimized to keep production moving, and finance is under growing pressure to deliver the same level of speed, accuracy, and control. Accounts Payable (AP) sits at the intersection of procurement, production, and finance, but in many manufacturing organizations it is a manual, fragmented, and reactive process. The result isn't just inefficiency. It introduces operational risk that can disrupt the business.

Invoices represent the raw materials, freight, equipment, and services that keep production running.

When AP slows down, it impacts:

- Vendor relationships
- Production timelines
- Cash flow
- Working capital

Yooz brings AP back in sync with operations, combining automation, control, and real-time visibility.

The Reality of AP in Manufacturing

High invoice volume environment	>	Raw materials, MRO, freight, services
Complex matching	>	2-way and 3-way across multiple documents
Multi-plant operations	>	Different workflows, entities, and systems
Vendor complexity	>	Large, changing vendor networks
Time Pressure	>	Tight timelines and cost pressure; production schedules don't pause

The Business Impact

Manual entry, email approvals, and disconnected systems struggle to keep up with manufacturing complexity, creating delays, bottlenecks, and limited visibility resulting in late payments and operational risk.

These challenges directly impact production and delivery performance.

Turning AP into a Strategic Control Point

The goal isn't just efficiency. It's greater control, visibility, and resilience across financial operations.

With AP automation:

Manual invoice processing is replaced with intelligent capture and routing.

Approval delays become streamlined, with policy-driven workflows.

Matching bottlenecks are reduced through automated validation.

Limited visibility is transformed into real-time insights into liabilities and cash flow.

Payment risk is minimized through stronger controls and monitoring.

Disconnected **processes become standardized and scalable**.

AP evolves from a transactional function into a strategic control point that supports business stability and growth.

The Business Impact

Speed is not the goal. Stability is.

With Yooz, manufacturers can achieve:

Financial Control

- Predictable working capital
- Improved cash visibility
- Faster month-end close

Operational Stability

- Fewer production disruptions
- Faster payments
- Stronger vendor relationships

Efficiency Gains

- Lower cost per invoice
- Reduced manual workload
- Scalable without headcount

When AP runs efficiently, finance gains more than speed. It gains the visibility and control needed to support production, protect cash flow, and make better business decisions.

Why Yooz for Manufacturing

Yooz is built for environments where financial processes can't fall behind operations.

It supports:

- High-volume invoice processing
- Multi-plant and multi-entity workflows
- Complex matching requirements
- Large vendor networks
- Real-time visibility and control

It aligns finance with the speed and structure of production, helping stabilize operations when timing and accuracy matter most.

Manufacturing already runs with precision. Finance should, too.

Schedule a demo and see how Yooz brings financial control to every part of your operation.

About Yooz

Yooz is the most intelligent financial operations automation solution that fights waste, risk, fraud, and errors – all while driving growth and profitability. We deliver Lean Financial Operations™ for the most ambitious companies on the planet, to even the most complex financial environments, so you can achieve the clarity you deserve to grow.

Our solutions power financial operations automation with an unmatched combination of the most flexible workflow engine, the smartest real-time applied AI and data insight, the most intuitive user experience, and the most comprehensive end-to-end transparency – all protected by the most secure, AI-driven document fraud protection. The result is financial operations that are faster, simpler, deeper and safer. We're customer obsessed. We have 7,000+ customers globally and have processed 300m+ invoices.

Yooz North America is HQ'd in the Dallas, TX metropolitan area with global offices in Europe.
